1 CONNECT Upgrade

**Забележка! Показаната снимка може да се различава от реалната.**

Продуктов номер: [99558443](#)

The CONNECT upgrade for Grundfos MIXIT is suitable when MIXIT is part of a building management system (BMS). The integration can be done via BACnet IP, BACnet MS/TP, Modbus TCP or Modbus RTU.

The connection is configured via a wizard in the Grundfos GO Remote app, ensuring easy and safe setup.

The CONNECT upgrade also gives access to Grundfos BuildingConnect Professional, which offers real-time monitoring, including alarm and warning notifications, and the ability to control the system.

The upgrade is activated using the Grundfos GO Remote app. The DYNAMIC and CONNECT upgrades can be combined.
